

The Virginia OEMS and 24-7 EMS are working to approve all online course content. 24-7 EMS will continually be adding curriculum throughout the year and will seek Virginia approval on all new courses added.

It is your responsibility to:

- Make sure the course has been approved for continuing education credit at your provider level
- Determine which category level the course has been approved for
- Determine if the course covers the specific topic area needed for recertification

If you take courses prior to state approval you will not receive credit for the course and the completion will not be reported to the state. Pre-approvals below are for completely online courses. Any courses taken in a classroom or blended format will need to get approved by Virginia OEMS by the provider.

24-7 EMS will update this list as new courses are approved.
