

# HSI's Asset and Vehicle Management

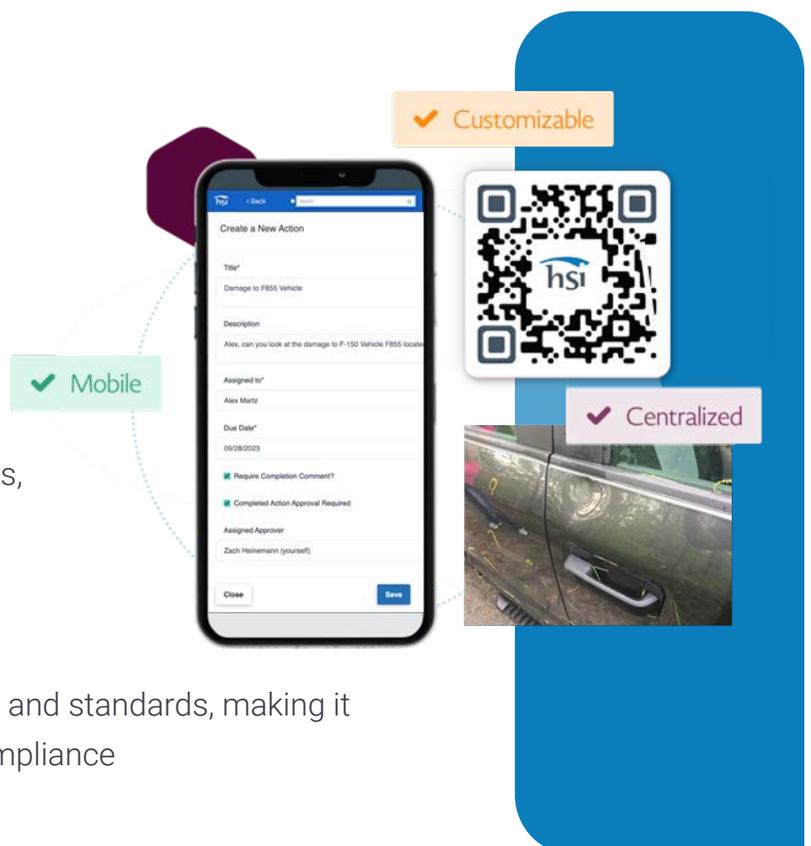

## Maximize Efficiency and Control with our Asset and Vehicle Management Powerhouse.

Streamline your asset and vehicle lifecycle from acquisition to disposal with our comprehensive and user-friendly system. [Gain full visibility](#) and control over your assets and vehicles, track maintenance schedules, optimize resource allocation, and make data-driven decisions to maximize efficiency and reduce costs. With real-time analytics, automated workflows, and seamless integration, our Asset and Vehicle Management capability empowers organizations to unlock the true potential of their assets and vehicles.

### Use Cases

[HSI EHS Asset and Vehicle Management](#) module would benefit organizations which meet any of the following:

- Have a large asset /vehicle inventory
- Have complex asset/vehicle life cycles, such as equipment maintenance, inspections, certifications, decommissioning, etc
- Managing remote assets/vehicles or distribution locations
- Are governed by strict EHS regulations and standards, making it important to monitor and maintain compliance

## The HSI Difference

**Complete Oversight and Risk Mitigation:** Gain complete oversight by having a centralized view of all your assets/vehicles, their locations, usage, maintenance history and more. Make informed decisions, optimize resource allocation and improve operational efficiency.

**Reduced Administration:** Eliminate manual errors, increase data collection and reporting accuracy with our automated system to show real-time data. Reduce time required for manual data entry and analysis and risk of noncompliance and penalties.

**Ultimate Configurability:** Customize to meet specific organization, regulatory, industry and company standards. Protect sensitive data with customizable access control. Seamlessly integrate with your organization to become an extension of your unique workflows, processes, and requirements.

**Generate Actionable Insights:** Quickly identify trends such as increasing maintenance costs, frequent breakdowns or declining asset performance. Send alerts for upcoming maintenance, warranty expirations or critical issues to prevent disruptions.

**Flexible Deployment:** Configure our out-of-the-box asset/vehicle management capability to meet your organization's unique requirements, while increasing employee engagement.

**Seamless Connectivity:** Frictionless integration with the broader HSI EHS system and using the same UI. Link to other modules such as [checklists](#), [audits](#), [incidents](#), and more.

**Security, Risk, and Compliance:** Adhere to various standards and regulations including RESTful API, SSO, 2FA, SAML 2.0, SOC 1-2, OSHA, DOT, OH&S, ISO 27001, ISO 9001, ISO 45001 and more.

**Data Capture:** Capture asset information, maintenance and repair data, asset utilization metrics, inspections and compliance records, lifecycle information, energy consumption and environmental data, financial data, and performance analysis.

### Features:

- User-friendly interface to increase engagement
- Mobile capability – submit from anywhere, at any time
- Flexible workflow
- Advanced reporting
- Connect to users profiles
- Role-based access
- Seamless integration with training management
