

# HSI's

## EHS Premium Insights Reporting

Turn your EHS and Training data into actionable insights to discover *why* things happen and how to **improve compliance performance in the future**.

The HSI Premium Insights reporting solution combines best-of-breed BI capabilities with a tailored EHSQ experience. Make data useful to everyone from executives to business units to on-site workers. Finally discover inefficiencies, track the effectiveness of initiatives, assess compliance risks, and drive value.

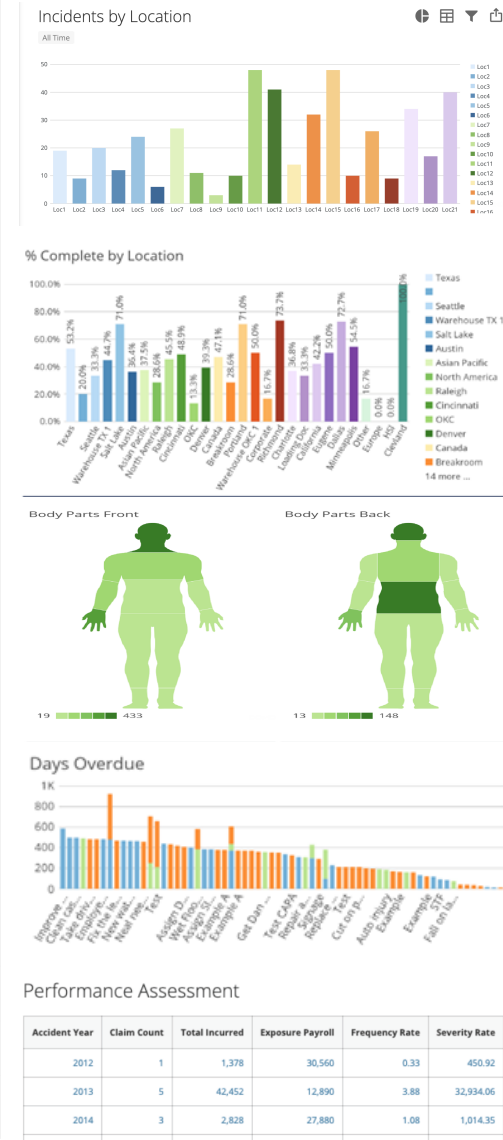

### EHS Insights BI Reporting

While the HSI EHS system comes standard with out-of-the-box reports and dashboards, HSI's powerful Premium Insights reporting engine extends your data with an underlying Business Intelligence (BI) reporting platform. This allows you to report on any EHS solution, form or subform in the HSI system, to access real-time analytics and intelligence right in your Dashboard. Drill down into individual records to uncover incident patterns, identify faulty equipment, or report on KPIs.

Reports can be made available to all users, or locked down only for specific teams, roles or locations. Reports can be surfaced on dashboards to give users a quick overview of what's going on in the organization when they first log in. Furthermore, dashboards can be configured with reports from different solutions to give key data from different areas of the business on a single dashboard.

Function	HSI Standard Reports	HSI Premium Insights
Provide Reporting on a Module Main from and a sub form. Including: field filtering, table view, graph view, CSV export	Y	Y
Provide reporting on the solution main form and all sub forms. Ability to export all required data and report on required fields from the solution(s).		Y
Filter for particular time period, eg. month, quarter, year.	Y	Y
Filter for particular time period, and provide comparison with the previous time period, and include a target.	N	Y
Provide Graph views on Incident (Event) or Hazard Types.	Y	Y
Provide a filtered report that you can drill down the report for more detail	Partial	Y
Provide Injury Frequency Rates over time against a target		Y
Provide reports on action completion and overdue status	Y	Y
Provide gauge reporting including targets		Y
Provide performance against KPI metrics		Y
Provide a number of key metrics in tables and graphs and scroll through the data		Y
Automatic email report triggers and alerts		Y
Extract in native office formats (eg. Excel and Powerpoint)		Y
Email reports based on schedule without the need to login into HSI Dashboards		Y

## Example Reports

### EMPOWER ALL YOUR PEOPLE WITH INSIGHTS

Peace of mind that all your people are seeing and working on the things that matter. Remove information clutter by delivering the right insights and messages at the right time.

### DESIGNED FOR THE NON-TECHNICAL USER

Don't wait months for IT to prepare and create the reports you need today. Dig deep and turn your data into actionable insights without requiring programming expertise.

### ALL YOUR DATA CONNECTED IN ONE SPOT

Skip the headaches and see all the metrics that matter to you in one place. HSI connects data from disparate sources and transforms it into actionable insights.

### REAL-TIME ALERTS

Create alerts on KPIs or thresholds and manage in real-time. You can get alerted via email or text. Get a 360 degree view of your organization's risk data and respond proactively.

**“**This system helped us improve our TRIR from 4.8 to 1.46. On top of this, logging and analyzing more data improved our audits and inspections, which in turn decreased citations and fines, decreased insurance rates, and made us more competitive in the market.” ~ Corporate Safety Director, DH Pace
