

Checklists & Inspections Management

Create customized checklists and inspections to streamline safety and operational activity.

Use checklists and inspections to efficiently create accountability and dedicated follow-up of key tasks, and achieve superior quality assurance.

Using HSI's capabilities, connect what is happening in the field to the boardroom in real-time to instantly identify any risks, hazards, quality, or other compliance issues. Create the perfect 'fit for purpose' checklist and inspections forms and facilitate the flow of your data in line with business needs.

Use Cases

HSI's Checklists & Inspections Management would benefit organizations which meet any of the following:

- Have mobile field staff, working in hazardous environments, requiring real-time monitoring and risk control through efficient checklists and inspections
- Want to check on, or report on, the progress of any given task quickly
- Operate in dynamic and rapidly changing environments, necessitating proactive identification and management of risks through flexible and adaptable inspections
- Want to reduce the administration required to provide real-time input
- Need to ensure compliance with required protocols and performance standards
- Need to ensure contractor credentials, licenses, insurances, etc are compliant prior to undertaking work
- Want to increase worker mobility - no more being tied to a laptop or desktop computer
- Want to increase precision and accuracy of data
- Want access to over 100 template checklists and inspections

<p>Complete oversight & risk mitigation</p> <p>Receive real-time data to identify workplace hazards that can cause potential harm to people, process and environment. Determine root causes, recommend corrective actions and keep track of steps taken to eliminate hazards.</p>	<p>Reduced administration</p> <p>Easily access over hundreds of checklists and inspections effortlessly complete them right from the field using your mobile device. Our intuitive forms are pro-processed and assimilated instantaneously among teams.</p>	<p>Ultimate configurability</p> <p>Customize any forms, create unique workflows and adhere to the regulatory requirements that are applicable to your unique workplace.</p>
<p>Generate actionable insights</p> <p>Never miss a thing. Delegate tasks to the right person, and send automatic notifications on overdue tasks if a deadline is missed. Flag issues in real-time to keep your processes on track.</p>	<p>Flexible deployment</p> <p>HSI EHS provides organizations with the flexibility and adaptability they need to meet their changing needs and support continuous improvement.</p>	<p>Seamless connectivity</p> <p>Frictionless integration with the broader HSI platform and using the same UI. Link to other capabilities to track corrective actions, checklist status for contractors, employees and more.</p>
<p>Features</p> <ul style="list-style-type: none"> • Adapt pre-built forms or create your own • Initiate correct actions • Automated notifications • Configurable forms & acknowledgements • Link to other HSI EHS modules • Manage controls • Schedule checklists • Geo-tagging • Flag issues • Offline capability • Advanced scoring and calculations 	<p>Configurability</p> <ul style="list-style-type: none"> • Forms • Acknowledgements • Version control to eliminate desperate checklists • Flexible workflows • Corrective Actions • Automate work orders and tasks • Reports and dashboards • Integrate with other solutions 	
<p>Data capture</p> <ul style="list-style-type: none"> • Hazard Identification • Type of checklists and inspections • Workflow state • Image capture with annotations • Time stamps • Videos • Track resolutions • Due dates • Locations • Priorities 	<p>Insights & reporting</p> <ul style="list-style-type: none"> • Version control to eliminate desperate checklists and inspections • Quick Access to frequently used checklists and inspections • Compliance status • Understand causal factors that are driving non-conformance • Distribute your data and reports automatically
