

Incident Management

Intelligent, end-to-end incident management and reporting capabilities.

Incident Management is a full-circle tracking system helping you record, investigate, and resolve incidents and other events that occur within your organization. Get automatically notified by email when new reports are submitted. Manage incident logs for several establishments or OSHA reporting entities. Output incident data into an OSHA 300, 300a, and 301 forms. It's everything your team needs, all in one place.

Use Cases

HSI EHS Incident Management Module benefits organizations which meet any of the following:

- Ability to access incidents, near misses, corrective actions and more, from any device
- Detect and quickly respond to incidents to prevent future damage, reducing financial and operational impact
- Create corrective and preventive actions and link them to root causes
- Send notifications, reminders, and escalation alerts
- Integrate with all the tools your team loves – from HR payroll, financial, and more
- Gain transparency and visibility across your organization
- Take a proactive approach, instead of a reactive, when it comes to incidents
- BI powered insights to remove blind spots and expedite informed decision making
- Increase your workplace compliance

The HSI Difference

Complete Oversight & Risk Mitigation: Our advanced reporting allows you to analyze threats, incidents and investigation data to uncover the root cause and potential links. Let data drive your re-commendations, so you convert incidents into insights.

Reduced Administration: Automated workflows combine with powerful automations and smart forms to create a hyper-efficient incident response approach. Free employees from spending hours on repetitive low-impact work.

Ultimate Configurability: Customize any forms, workflows, notification, documents, policies and more. Our no-code system creates an incident process that is future ready!

Generate Actionable Insights: Uncover key incident KPI's such as recordable rates, average time to resolve, time between incidents, body parts affected, assets involved, workforce demographics to workplace injuries, and more.

Flexible Deployment: Configure our out-of-the-box OSHA incident module to meet your organization's unique requirements.

Seamless Connectivity: Frictionless integration with the broader [HSI EHS system](#) and using the same UI. Link to other modules to track [contractor incidents](#), [corrective actions](#), [injury management](#) and more.

Risk & compliance: Adhere to various standards and regulations including OSHA 300, 301, 300A forms, DOT, OH&S and more.

Features:

- Capture incidents or near misses in 60 seconds
- Intuitive UI to maximize adoption
- Built in OSHA 300, 301 and 300A forms
- Automated corrective actions
- Connected with training, injury management and SDS for a complete workplace compliance platform
- Online and offline mobile capabilities
- Predictive analysis allows you to identify trends and potential hazards
