Mobile-Web App

## Revolutionize Your Mobile Experience with Our Cutting-Edge Mobile-Web App

The HSI mobile-web app offers an innovative, mobile-first approach that allows users to perform essential tasks with a native app-like experience directly from their web browsers. Our mobile-web app is designed to provide seamless access to EHS, LMS, and Chemical modules, enabling users to view dashboards, complete forms, search materials, and more, all from their mobile devices.

Benefits

The HSI EHS mobile-web app benefits organizations that require:

- A mobile-friendly solution to access EHS, LMS, and Chemical functionalities on the go

- The ability to view and interact with dashboards, record details, and complete tasks efficiently

- An intuitive, native app-like experience without the need for app store distribution

- A solution that remembers login credentials and launches from a dedicated app icon

- An environment that supports accessing training modules, reviewing member transcripts, and managing chemicals with ease

The HSI Difference

Improve Communication and Engagement:
Perform critical tasks like viewing dashboards, recording details, and completing forms from any mobile device with a consistent, native applike experience.

Enhanced User Experience: With a dedicated app icon and fullscreen display without the URL bar, HSI mobile-web app has the feel of a native app, making it intuitive and easy to use.

Enhanced Safety Culture: By providing easy access to training materials, dashboards, and real-time data, the app strengthens engagement in safety processes—an essential factor in maintaining safety and compliance within your workplace.

Seamless Single Sign-On (SSO): The app supports SSO, allowing users to securely access the app with theirexisting credentials without the need for multiple logins, streamlining the user experience and enhancing security.

Cross-Platform Compatibility: The app runs smoothly on various devices and operating systems, ensuring a consistent user experience whether on Android, iOS, or desktop environments.

Security and Compliance: Built with the latest security standards, HSI mobile -web app ensures that your data is protected, while also supporting compliance with industry regulations.

Security, Risk, and Compliance: Adhere to various standards and regulations including OSHA, DOT, OH&S, ISO 9001, ISO 45001 and more.

Data Capture: Capture various critical data points such as incident details, audit information, permits, and more, ensuring comprehensive and accurate data management. And use Geo-Tagging to capture data such as location information when recording incidents or accessing materials from various environments.
