

Risk Management

Driving Resilient and Proactive Operations through Risk Management.

Empower your organization with a comprehensive and proactive approach to risk management. HSI [EHS Risk Management](#) Module provides a robust system to identify, assess, and mitigate risks, ensuring safe and sustainable operations. With real-time data analysis, actionable insights, and customizable workflows, HSI EHS Risk Management Module enables organizations to make informed decisions, improve risk response strategies, and foster a culture of risk awareness and resilience.

Use Cases

HSI [EHS Risk Management](#) capabilities would benefit organizations which meet any of the following:

- Operate in industries or environments with inherent risks
- Are governed by strict regulations and standards, making it important to monitor and maintain compliance, track regulatory changes and implement risk control measures
- Need to enhance their risk awareness and communication
- Looking to prioritize sustainability and resilience
- Facing complex risk scenarios involving variables and interdependencies
- Organizations who are customer facing with high stakeholder expectations

The HSI Difference

Complete Oversight & Risk Mitigation: Identify potential risks, ensure workplace compliance, and continuously improve your EHS performance by identifying areas for improvement and taking corrective action.

Reduced Administration: Centralized, automated Risk Management capabilities eliminates manual data entry, saves time, and allows you to focus on proactive risk mitigation and strategic decision-making.

Ultimate Configurability: Adapt to evolving complexities and ensure future readiness. With customized workflows, risk assessment methodologies, reporting mechanisms it enables the flexibility and scalability your organization requires to grow.

Generate Actionable Insights: Peel back the layers of complexity, uncover hidden gaps and gain a comprehensive view of risks from every EHS corner. HSI EHS Risk Management capabilities help provide operational resilience.

Flexible Deployment: [The HSI Platform](#) facilitates easy onboarding and phased rollout. This flexibility ensures a smoother transition, minimizes disruption, and enables you to adapt the deployment strategy to your unique requirements.

Seamless Connectivity: HSI EHS becomes your centralized command center, connecting other HSI capabilities such as [incidents](#), [audits](#), and [training](#), but to your entire organization fostering a proactive and collaborative approach to risk mitigation.

Risk & Compliance: Adhere to various standards and regulations including RESTful API, SSO, 2FA, SAML 2.0, SOC 1-2, OSHA, ANSI/AIHA, Z10, ISO 27001, ISO 45001, ISO 31000 and more.

Features:

- User-friendly interface to increase engagement
- Mobile capability – submit from anywhere, at any time
- Flexible workflow
- Advanced reporting
- Connect to users profiles
- Role based access
- Seamless integration with training management
