

EHS & ESG

Build Exactly What You Need

What Is It?

Our [EHS & ESG Systems](#) provide unparalleled options and flexibility, allowing you to tailor the system to your unique workflows and processes. HSI seamlessly integrates all the pieces of a successful safety management program in one place, helping you achieve maximum efficiency while maintaining compliance.

Who Is It For?

Any organization currently using multiple systems to manage their safety, risk, chemicals, and training programs would benefit from consolidating capabilities onto one platform. It is also ideal for companies looking to replace an existing safety management systems.

Features:

- Countless combination possibilities, with 30+ modules to mix and match for your specific needs.
- Pick a solution that best fits your challenges like Worker Safety and Wellness, ESG, Control of Work, Operations Risk, and Chemical Management.
- Choose from capabilities such as Incident Management, Corrective Actions, Audits and Inspections, Asset Management, Document Control, Contractor Management, and more.
- Fully configurable dashboard reports and widgets.
- Custom risk matrix, document exports, workflows, user roles, and more.

Benefits:

- Build exactly what you need and nothing you don't.
- Go beyond simple health and safety with coverage across other critical areas such as quality, environment, and risk.
- Unify your EHS, employees, suppliers, contractors, and vendors across all locations, devices, and workplaces.

HSI Solutions

Keep it Simple

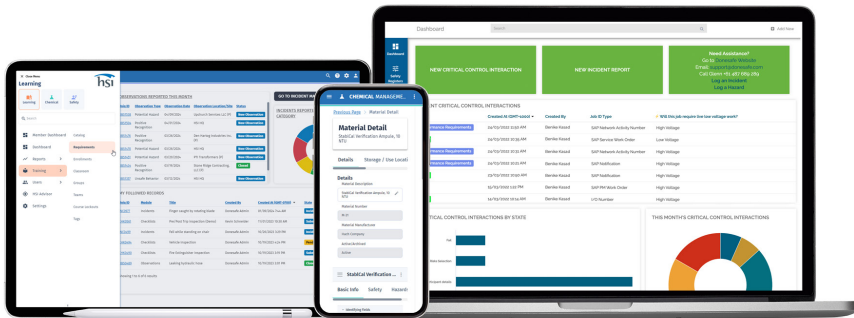

What Is It?

When it comes to safety and risk management, organizations often ask, "Where do we start?"

Unified into the HSI Platform, the EHS System provides straightforward, effective solutions designed to help you quickly address key challenges.

Who Is It For?

The HSI Platform is perfect for the small- and medium- sized businesses. However, companies of any size looking to more efficiently manage their systems can benefit.

Six Solutions:

- 1 [Worker Safety](#)
- 2 [Worker Wellness](#)
- 3 [ESG](#)
- 4 [Control of Work](#)
- 5 [Operational Risk](#)
- 6 [Chemical Management](#)

Benefits:

- Quick "go live" timeframe (typically about 1 month).
- AI-powered intelligence providing suggested learning pathways, suggested hazards, and corrective action recommendations.
- Templated workflows and forms help eliminate time-consuming tasks.
- Automated tools replace manual processes, paper forms, and spreadsheets.
- Easily upgrade to other EHS Modules
