- Pre-built dashboards and reports
- Consistent training materials for all customers

Extremely competitive pricing packages starting at \$5,000!

Bundle and Save!

Get up to 20% off when you bundle HSI solutions together.

Lower Risk: Companies can organize and view data by location/business units so the root cause of injuries and illnesses can be identified to lower risk.

Save Time: Utilizing the system requires less data-entry for operational roles, allowing them to focus on core responsibilities.

Easy-to-Use: Our software is quick to learn and jargon free. Quality audits and inspections can be completed by your team in minutes, allowing them to get back to work quicker.

Reporting and Dashboards: Gain total control of the audit lifecycle by leveraging real-time reporting and dashboards. Immediately understand key risks and under-performing controls across your organization.

Access on Any Device: You don't need to be at your desk to access information. Access anytime, from anywhere, on the smartphone, computer or tablet of your choice.

Leverage Real-Time Data: Leverage real-time data and streamlined workflows to enforce compliance, improve data integrity, and eliminate time consuming admin tasks.
