

# Simplify Chemical Management with HSI's Advanced Platform

Chemicals and hazardous substances are present in nearly every workplace, yet many organizations still rely on outdated spreadsheets or binders to manage their SDS inventory. This not only complicates compliance but also puts employee safety at risk.

**HSI's EHS Chemical Management** streamlines inventory tracking, ensures SDS compliance, and enhances workplace safety—all within a single, efficient EHS System. By integrating **EHS, ESG, compliance, training, and risk management into one solution**, organizations can improve efficiency and accuracy.

## What makes HSI's EHS Chemical Management different?

- **Software Integration:** The HSI platform seamlessly integrates SDS management, learning management, EHS platform, and reporting into one, easy-to-access and easy-to-use platform.
- **Data Quality:** One of the highest accuracy ratings in the industry.
- **Service Expertise:** A skilled team of experts with years of experience in chemical compliance, SDS authoring, and SaaS platform development.
- **On-Site Inventory:** Chemical management starts with a thorough, on-site, physical inventory. HSI offers OSI services with full-time experts to complete your chemical inventory on-site at all locations.

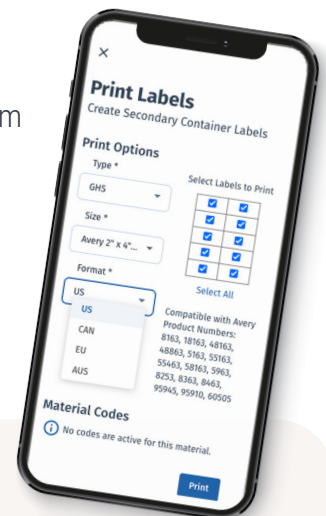

## HSI Chemical/SDS Management Features:

- **Instant SDS Access:** 24/7 availability, online and offline
- **Configurable Views:** Tailored access for facilities and users
- **Automatic SDS Updates:** Direct from manufacturers
- **Advanced SDS Data Indexing:** Simplifies searches, reporting, and hazard analysis
- **Secondary Container Labeling:** Stay compliant with clear labeling
- **Advanced AI Capabilities:** Automates processes and provides smarter insights
- **Tier 2, CFATS/DHS, NYC 209u Reporting:** Simplified compliance with local and federal regulations
- **QR Code Capabilities:** Instant access to SDS data on-site via QR codes
- **Regulatory Impact Analysis and Regulation Management:** Stay ahead of regulatory changes
- **Quantitative Inventory Toolset:** Detailed, data-driven insights for inventory management
- **Chemical Approval Workflow:** Streamlined approval process for new chemicals
- **Decision Matrix: New SDS Revision Approval Toolset** – Improve decision-making with automated revision tracking
- **API Integration:** Seamlessly connect with other systems for enhanced data flow

## On-Site Chemical Inventory (OSI) Services:

- **Full SDS Data Upload** – Upload your existing SDS data into our proprietary system for central management
- **On-Site Audits** – Conduct thorough audits to identify, categorize, and track all chemicals on-site
- **Location Tracking & SDS Matching** – Ensure full visibility of chemical locations and accurate SDS matching

## Why HSI?

- **Maximize ROI** with a single, unified system for EHS, SDS, ESG, HR Compliance, and training management
- **Save time** and enhance learning with AI-driven learning paths, offering access to over 5,000 safety, compliance, and professional development courses in one extensive library tailored to your employees' needs.
- **Streamline processes** with seamless integration between HSI Learning Management & EHS systems
- **Enhance safety culture** with AI-tailored training solutions for every business type, employee role, and industry
- **Adapt and scale** with customizable solutions that meet your unique needs
- **Increase efficiency** with automated inventory reports, both standard and custom

[Future-proof your chemical management](#) with AI-driven efficiency and a fully integrated [EHS System](#) – because compliance and safety should never be a guessing game.
