

WHITE PAPER

HSI Intelligence **Transforming EHS and LMS with AI-Powered Precision**

INTRODUCTION:

A New Era in EHS and LMS

As industries worldwide strive to meet ever-evolving safety standards and regulatory requirements, Environmental Health and Safety (EHS) leaders face mounting pressures to create safer, more efficient workplaces. With the rise of AI, the future of safety and learning is shifting toward data-driven solutions that predict risks, provide actionable insights, and help professionals

stay proactive. Yet, not all AI is created equal. The effectiveness of AI depends on the quality and integrity of the data that fuels it.

HSI Intelligence stands apart by integrating AI into a unified platform that brings together safety, training, and compliance in a way that's unmatched. Our AI doesn't operate in isolation or rely on disparate data sources; it draws from HSI's own industry-vetted library of 5,000+ courses, incident data, and expert resources.

This means that every recommendation and insight provided by HSI Intelligence is rooted in reliable, proven information, ensuring that safety professionals can make informed, accurate decisions.

Why AI Matters: Keeping Pace with a Rapidly Evolving Landscape

The demand for proactive, accurate safety measures is greater than ever. Traditional safety and compliance systems often lack the speed, integration, and insight that modern workplaces require. AI is reshaping the landscape, empowering safety professionals to predict and prevent incidents, streamline compliance, and enhance workforce learning in ways that were previously unimaginable.

But for AI to be a true asset, it must draw from dependable sources. Without trustworthy data, AI becomes just another tool, prone to inaccuracies and incomplete information. HSI Intelligence sets a new standard by combining powerful AI with HSI's rigorously vetted knowledge base, creating a solution that goes beyond superficial analytics to deliver actionable intelligence that professionals can trust.

The Unified Power of HSI Intelligence

HSI Intelligence is more than just an add-on; it's an intelligent core within the HSI platform that seamlessly connects all elements of workplace safety, training, and compliance. In our platform, data flows effortlessly across all functions—whether incident tracking, employee training, or chemical safety management. This interconnectivity allows HSI Intelligence to analyze data holistically, providing insights that are comprehensive, relevant, and tailored to each organization's unique environment.

HSI's platform unified design removes the barriers typically seen in fragmented systems, ensuring that information doesn't just pass through isolated channels but instead fuels a network of connected insights. By housing EHS, LMS, and SDS data in a single ecosystem, HSI Intelligence offers a level of transparency and accuracy that truly sets it apart. This interconnected intelligence allows HSI Intelligence to create a proactive safety environment, one where every action, lesson, and report informs the next.

Core Capabilities of HSI Intelligence

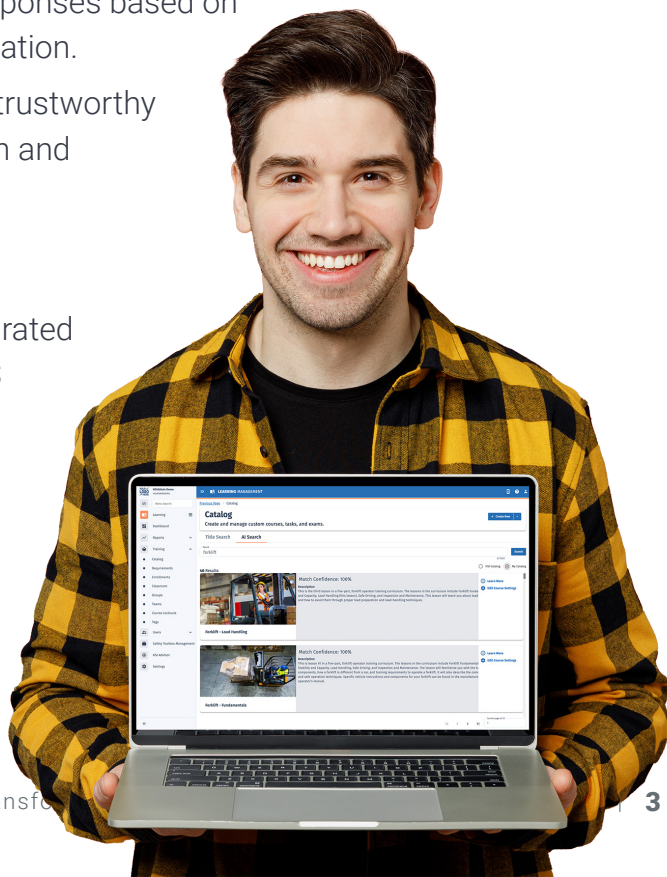

HSI Intelligence is designed to make safety professionals' lives easier, giving them a powerful ally in risk prediction, training, and compliance management. Here's how it transforms daily safety operations:

1 Ask a Question

- **Overview:** Users can ask complex EHS and compliance-related questions directly within the platform, receiving responses based on HSI's exclusive, thoroughly vetted information.
- **Benefits:** Instantly answers queries with trustworthy insights, reducing time spent on research and enhancing decision-making accuracy.

2 Course Recommendations

- **Overview:** Users can search through a curated library of 5,000+ courses, tailored to EHS and compliance standards, powered by AI-enhanced search that delivers precise results.
- **Benefits:** Helps professionals quickly locate relevant training and resources, ensuring their teams remain informed, compliant, and prepared.

3

Tailored Learning Paths

- **Overview:** Customized learning paths are developed based on each user's training history and safety needs, providing the right training at the right time.
- **Admin Functionality:** Administrators can trigger tailored recommendations for individuals and directly enroll them into relevant courses, making training management effortless.
- **Member View:** Employees have access to a personalized dashboard that shows recommended courses, allowing them to self-enroll, encouraging a proactive approach to learning.
- **Benefits:** Enhances engagement, retention, and efficiency by aligning training with individual needs, reducing administrative tasks for safety teams.

4

Training & Corrective Action Recommendations

- **Overview:** HSI Intelligence analyzes incident history and other safety data to provide AI-driven corrective action recommendations. This ensures that each recommendation is closely tied to specific safety risks and incidents, helping teams address the root cause of issues effectively.
- **Benefits:** By linking corrective actions to real-time data, this feature ensures that safety teams are proactive in mitigating risks, while training recommendations are tailored to address identified gaps in knowledge and behavior, improving overall workplace safety and compliance.

5

Image Hazard Recognition

- **Overview:** Workers can submit images of their work environment to HSI Intelligence, which uses AI-powered analysis to identify potential hazards in real-time. The system then provides recommended preventive measures, guiding employees in making the necessary adjustments.
- **Benefits:** This feature enhances workplace safety by enabling real-time hazard detection and offering immediate, actionable recommendations. It helps reduce manual inspections, improves hazard awareness, and ensures that potential risks are addressed before they lead to incidents.

REAL-WORLD IMPACT: AI-Driven Incident Response and Prevention

At a manufacturing site, a forklift incident occurs in the yard, resulting in a minor injury. The safety officer logs the incident into the HSI platform via mobile app. Instantly, HSI Intelligence springs into action:

- **AI Image Hazard Recognition:** The forklift operator uploads an image of the scene. The AI identifies a missing safety guard on the forklift, flagging a potential risk.
- **Corrective Action:** The AI summarizes the incident report and generates a list of corrective actions, including the installation of the missing guard. It also assigns relevant training courses to the involved employees to ensure they are prepared for similar risks.
- **AI-enhanced Q&A Tool:** The safety officer asks the AI for forklift safety standards. The system provides a clear response with safety protocols and links to relevant courses, helping the operator quickly address the issue.
- **AI Learning Path Recommendations:** The system creates a personalized training plan for the forklift operator, focusing on safety measures relevant to their role, ensuring they receive the right training at the right time.
- **AI Course Recommendations:** The AI suggests safety training for all yard employees based on the incident data, ensuring compliance and keeping workers prepared for similar risks.

By using **HSI Intelligence**, safety officers **save time, reduce administrative burdens, and create a more secure work environment**. This connected approach allows teams to address incidents holistically, reinforcing the value of having a single, EHS platform.

How HSI Intelligence Outpaces Competitors

Other AI-powered solutions in the market focus on isolated EHS functions, often operating within fragmented systems that limit data flow and reduce accuracy. HSI Intelligence, however, is uniquely positioned to provide a connected, holistic view of safety and compliance.

- **Single-Source Integrity:** Drawing from a single platform housing verified EHS, training, and chemical safety information, HSI Intelligence ensures that recommendations are accurate and reliable.
- **Comprehensive, Actionable Recommendations:** While other EHS software AI's provide useful data suggestions, they lack the interconnected flow of information found in HSI's platform. HSI Intelligence builds on integrated, real-time insights that other systems can't match, from training recommendations to corrective actions and incident management.
- **Unparalleled Content Library:** With access to over 5,000 industry-vetted courses, HSI Intelligence offers the most comprehensive EHS training resources available, powering its AI with expert-driven content that has been thoroughly vetted for accuracy and relevance.

THE HSI ADVANTAGE: A Unified, AI-Driven Platform

HSI Intelligence doesn't just support EHS and LMS; it transforms them. By unifying safety, training, and compliance within one platform, we help organizations foster a safety culture that is proactive, data-driven, and scalable.

KEY BENEFITS INCLUDE:

Enhanced Decision-Making: With predictive insights and corrective recommendations, safety professionals can make decisions that proactively protect their workforce.

Single Platform Simplicity: HSI's unified ecosystem eliminates the need for multiple systems, providing seamless, centralized access to all EHS, training, and SDS data.

Scalability: Built for organizations of all sizes, HSI Intelligence offers flexible solutions that scale with your business, from SMBs to global enterprises.

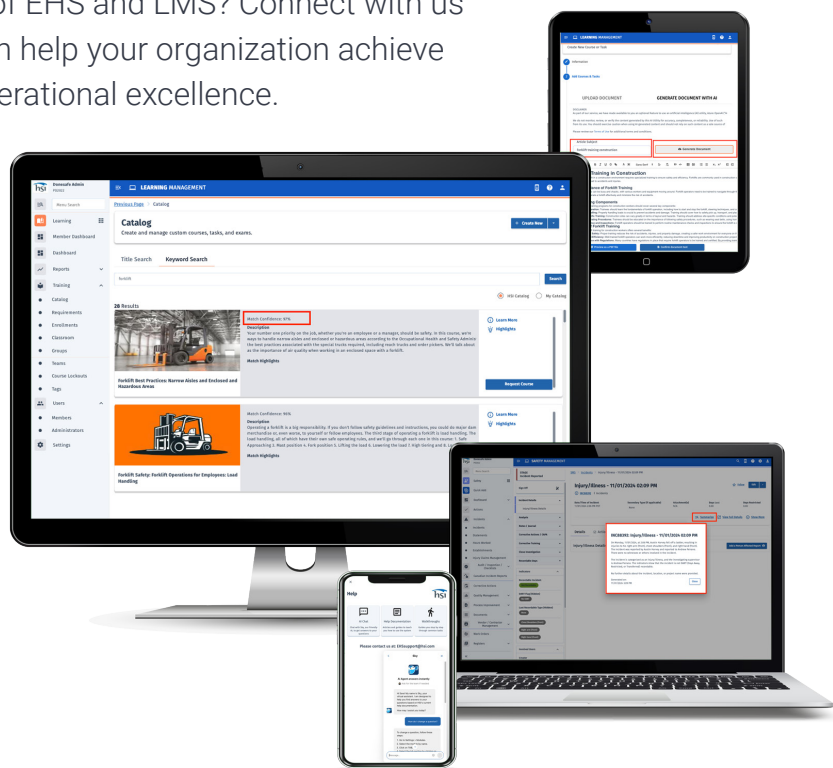

CONCLUSION:

HSI Intelligence – Your Partner in Safety and Learning Innovation

HSI Intelligence represents a bold step forward in EHS and LMS management, leveraging AI to make safety and training simpler, smarter, and more effective. By choosing HSI Intelligence, safety professionals gain a powerful tool that not only simplifies their workload but also enables them to predict and prevent incidents, creating a safer and more resilient workplace.

Ready to experience the future of EHS and LMS? Connect with us to learn how HSI Intelligence can help your organization achieve new standards of safety and operational excellence.

About HSI

HSI is your single-source partner for EHS, Compliance, and Professional Development solutions. HSI provides integrated e-learning content, training solutions, and cloud-based software designed to enable your business to improve safety, operations, and employee development. Across all industries, HSI helps safety managers, and technical employees, human resources, first responders, and operational leaders train and develop their workforce, keep workers safe, and meet regulatory and operational compliance requirements. HSI's focus is on training, software, and services for safety and compliance, workforce development, industrial skills, and emergency care. HSI is a unique partner that offers a suite of cloud-based software solutions including learning management, safety management, chemical SDS management, and more, integrated with content and training so businesses can not only monitor and manage multiple workflows in one system, but train employees via one partner.
