

On-Site Inventory Services

Does your company have an accurate,
up-to-date safety data sheet (SDS) collection?

Are you prepared for a surprise chemical audit or
inspection at your locations?

With HSI's On-Site Inventory (OSI) services, we offer a solution that will bring transparency, organization and streamlined reporting to your chemical management and compliance process.

With HSI OSI, we improve your chemical library accuracy while helping your organization meet OSHA requirements for regular chemical inventories and employee Right to Know (RTK) obligations.

HSI's on-site inventory includes:

- Uploading your existing SDS data into your SDS library
- Conducting a methodical, facility-wide physical on-site inventory
- Categorizing and identifying the locations of all products
- Matching each product to your SDS library through our proprietary mobile inventory software
- Assisting in the acquiring of SDSs not currently in your library
- Compiling our findings into a comprehensive Chemical Inventory Summary

Your successful inventory supports the ground work for government reporting obligations.

Why choose HSI

- Our experienced, trained technicians are:
 - Committed to excellence in customer service
 - Full-time employees, not contractors
 - Drug- and alcohol- tested

Improve your chemical intelligence with HSI

Visit the [HSI website](#) to learn how HSI helps companies of all sizes improve their chemical management through our On-Site Inventory services. Be sure to visit the [Resources](#) section for white papers, eBooks and case studies that show how a robust and comprehensive on-site inventory is the foundation of a successful chemical management program.
