

AVERT

Active Violence Emergency Response Training

When active violence occurs, seconds count, and you can't always wait for EMS to arrive. AVERT was developed by law enforcement, security and medical experts to empower everyone to become an immediate responder by learning active shooter response and emergency bleeding techniques.

Become an Instructor

You can become an Authorized AVERT Instructor in as little as one day. Our blended Instructor Development Course (IDC) provides the training and components you need to start teaching AVERT.

We Bring Training to You

An authorized AVERT instructor will travel to your facility to train your team. Students will first receive online training introducing them to the subject before the dynamic instructor-led session.

Bleeding Control Kits

HSI's unique TAC+PAC kits are designed to help save lives. Everything inside the portable kit is allergen-free and never expires. The TAC+PAC is always ready when you need it.

CPR, AED, & First Aid

We Bring Training to You

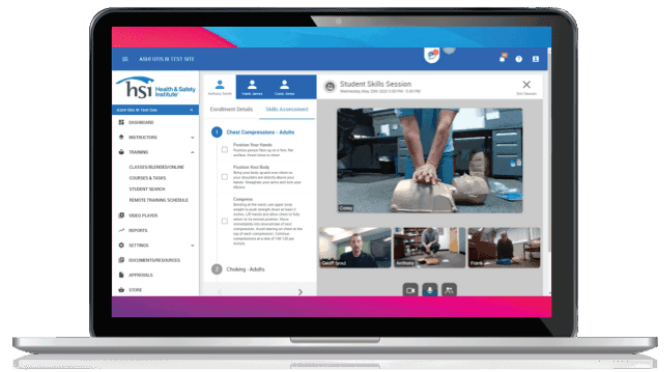

Let us handle your training through our National Training Solution network of authorized instructors. You'll have one point of contact, and we'll handle the coordination and scheduling of your CPR, AED, or first aid training.

Become an Instructor

HSI makes it simple for you to become an authorized instructor or training center for your own business or your workplace.

Already a CPR instructor? Ask us about our reciprocity program--you can use your existing credentials to build your business with us.

Full Certification

RSV - Remote Skills Verification:

Fully remote training uses blended, online cognitive learning with remote, live instructor-led skills verification. Sterilized assessment accessories are shipped to the student.

Full Classroom Training:

Traditional classroom training with both the cognitive and hands-on skills training delivered by an in-person instructor during a scheduled session.

Blended Training:

Cognitive training is delivered to the student to complete prior to the in-person hands-on skills session led by an instructor.

HSI's Nationally Recognized Programs Include:

- Adult First Aid | CPR AED
- Pediatric First Aid | CPR AED
- Basic Life Support (BLS)
- Bloodborne Pathogens
- Stop Life-Threatening Bleeding
