

EHS Platform

Build Exactly What You Need

What Is It?

Our EHS platform provides unparalleled options and flexibility, allowing you to tailor the system to your unique workflows and processes. HSI seamlessly integrates all the pieces of a successful safety management program in one place, helping you achieve maximum efficiency while maintaining compliance.

Who Is It For?

Any organization currently using multiple systems to manage their safety program would benefit from consolidating solutions onto one platform. It is also ideal for companies looking to replace an existing safety management platform or those with specific or advanced needs.

Features:

- Countless combination possibilities, with 50+ modules to mix and match for your specific needs.
- Choose from tools such as Incident Management, Corrective Actions, Audits and Inspections, Asset Management, Document Control, Contractor Management, and more.
- Fully configurable dashboard reports and widgets.
- Custom risk matrix, document exports, workflows, user roles, and more.

Benefits:

- Build exactly what you need and nothing you don't.
- Go beyond simple health and safety with coverage across other critical areas such as quality, environment, and risk.
- Unify your EHS, employees, suppliers, contractors, and vendors across all locations, devices, and workplaces.

Note: BI advanced reporting, data migration, language translations, system integrations, LMS and online training, and SDS/Chemical Management are available at an additional cost.

EHS Essentials

Keep it Simple

What Is It?

When it comes to safety management, organizations often ask, "Where do we start?" EHS Essentials is the easy answer to that question. This out-of-the-box solution is powered by the full HSI EHS platform but is streamlined to help you get up and running quickly, giving you access to the most-used set of EHS modules.

Who Is It For?

EHS Essentials is perfect for small- and medium-sized businesses that don't require a lot of customized safety solutions. However, companies of any size looking to more efficiently manage their safety program can benefit from EHS Essentials.

Features:

- Incident Management
- OSHA Recordkeeping
- Audits and Inspections Checklists
- Safety Observations
- Fleet Management
- Document Management

Benefits:

- Quick "go live" timeframe (typically about 1 month).
- Core best practice modules.
- Templated workflows and forms help eliminate time-consuming tasks.
- Automated tools replace manual processes, paper forms, and spreadsheets.
- Easily upgrade to the full EHS platform for additional tools when you're ready.

Note: BI advanced reporting, data migration, language translations, system integrations, LMS and online training, and SDS/Chemical Management are available at an additional cost.
