

# Industrial Skills

Anyone working in an industry that relies on general process facilities needs industrial skills training and services. HSI's Industrial Skills solutions provide technical training to allow employees to safely operate, maintain, and repair the equipment necessary to keep your business running efficiently and reliably.

## Industrial Skills Topics:

Our Industrial Skills team was built to help you meet your training needs, providing flexibility by offering both online and instructor-led learning. Our online training includes topics such as:

- Power Generating Systems and Operations
- Electrical Distribution
- Power Transmission and Distribution Simulation Training
- Qualified Electric Worker Training
- Operations and Maintenance
- Process Systems and Operations
- Industrial Machining and Welding
- NERC Certification and CEHs

## HSI Industrial Skills Features:

- More than 300 industrial skills courses
- Enhanced simulations replicate challenges in real-time operations
- Up to 75% of onboarding knowledge, serving as a base for on-the-job training over company processes and procedures
- 3D animation of large-scale equipment to demonstrate how things work
- Ability to choose off-the-shelf content or a custom training program
- Training program evaluation to ensure your personnel has the training and tools needed to increase reliability and reduce risk
- Team of SMEs with industry experience in power generation, electrical utility, manufacturing, and more
