Meet The Experts

Chad Johnson

Manager

Training Advisory Services

cjohnson@hsi.com

As Manager of Training Advisory Services for HSI Industrial Skills, Chad oversees large-scale training projects for clients in the power generation industry, including developing all-inclusive, turn-key programs. He is experienced in content development and technology solutions to support training needs in power generation and electrical distribution industries. Chad has also performed classroom training, worked as a simulator instructor, developed curriculum, and operated power plants.

Chad shared some insights into his career, current position, and past accomplishments below:

When and why did you decide to pursue a career in your field?

In the time I spent doing nuclear power for the U.S. Navy, I enjoyed my work in training the most, particularly developing training content. When it was time to move on to a new career, I naturally looked for opportunities to create training and work with other training developers.

What do you like best about your job?

The ability to collaborate with many people from varying backgrounds to deliver a quality product to our clients.

What project are you most proud of?

The addition of intro videos to our online lessons. I suggested the idea initially when some of us were brainstorming ways to make our content more competitive. I then shepherded the process of creating a standard

Meet the Expert: **Chad Johnson**

for us to use, worked with our production team so they could update the lesson player and the production process to support the new content. I then created storyboards and narratives for multiple intro videos and directed the graphics team to bring the ideas to life in the form of 3D animations.

How has your job changed over the past few years?

A gradual shift away from use of technical knowledge gained from work in the industry (which is no longer current in my case) towards experience in management (projects and people) and learning technologies as they apply to the power generation industry.

Give one word that describes you best.

Multi-faceted

What motivates you?

Learning something new

About HSI

HSI is your single-source partner for EHS, Compliance, and Professional Development solutions. HSI provides integrated e-learning content, training solutions, and cloud-based software designed to enable your business to improve safety, operations, and employee development. Across all industries, HSI helps safety managers, and technical employees, human resources, first responders, and operational leaders train and develop their workforce, keep workers safe, and meet regulatory and operational compliance requirements. HSI's focus is on training, software, and services for safety and compliance, workforce development, industrial skills, and emergency care. HSI is a unique partner that offers a suite of cloud-based software solutions including learning management, safety management, chemical SDS management, and more, integrated with content and training so businesses can not only monitor and manage multiple workflows in one system, but train employees via one partner.
