

# Meet Your Emergency Care Compliance Goals

HSI's National Training Solution brings certification training to you.

Does employee training for first aid, CPR and AED take up too much of your time and budget? Tired of shopping around for training classes? Need to ensure you have consistent training across multiple locations?

Make your employee training and compliance program easier to administer with HSI's [National Training Solution](#) (NTS), our onsite service delivery program for emergency care training. We coordinate training at an enterprise level and can tailor solutions based on your needs.

With NTS, you have access to our network of instructors, who bring engaging and effective onsite classes to you and your employees, along with one contact who will schedule and manage classes at all your locations - statewide or nationwide.

# Benefits of NTS

With [NTS](#), you get experienced and qualified instructors who deliver dynamic and engaging training to your employees who need or desire CPR, AED, and first aid certification.

- HSI programs are **designed for adult learners in an occupational setting**. They prepare your team with the skills and knowledge to respond to emergencies appropriately and with confidence.
- **A single point of contact** at HSI delivers complete scheduling and training management for multiple locations.
- The **quality, consistency and accountability** of a leading national training organization with the flexibility and responsiveness of local instructors.
- Consistency in training, regardless of location or state, **total program management for all your locations**.

## *Quality Comes First*

The NTS network is made up of approved HSI Training Centers (TCs) who are knowledgeable and professional instructors with years of training experience.

# How It Works

When you speak with your HSI NTS representative, we'll help you determine exactly what training you need and put together a customized plan to accomplish your training goals, using your preferred date range for your class(es).

Once we've secured your instructor, we'll send you a confirmation email with the date and time of your class, your instructor's name, and details about what you can expect in the class. We'll ship all required student certification materials to you prior to your class date, and your instructor will get in touch with you a few days before class for directions, parking details, and any other logistical information you need to share with them.

After the successful completion of class, your employees will receive certification cards on the spot. We will process your payment after the class takes place, and you may pay by credit card, invoice, or purchase order. You can also pre-pay for multiple classes if you wish to plan out your training for the year in advance.

# Why It Matters

More than 356,000 out-of-hospital sudden cardiac arrests occur annually in the United States, Nearly 90% of those SCAs are fatal. Effective bystander CPR, provided immediately after a SCA, can double or triple a victim's chance of survival. A recent study showed that layperson-initiated CPR occurs in approximately 40% of SCA incidents.

Empower your team with these lifesaving skills and help keep your company in compliance with an National Training Solution from HSI.

For more information or to book your first class, [contact us](#) or call us at 800-447-3177.
