

SHRM-Approved HSI Courses

Help HR Teams Maintain Certification While Building Organizational Capability

Support your HR team's certification goals while strengthening the skills critical to your organization's success. HSI offers a growing catalog of SHRM-approved courses that award 0.25 Professional Development Credits (PDCs) per course. This allows your HR team to maintain SHRM-CP® and SHRM-SCP® certifications while developing practical, workplace-ready skills that drive performance.

Deliver Certification + Capability

With HSI, you can support your HR team in the following ways:

- Provide 0.25 SHRM PDCs per eligible course
- Align HR development to the SHRM BASK framework
- Reinforce competencies tested on SHRM-CP® and SHRM-SCP® exams
- Centralize training, tracking, and reporting in one platform
- Scale credential-supporting learning across your HR organization

Aligned to the SHRM BASK Framework

Eligible HSI courses align to SHRM's Body of Applied Skills and Knowledge (BASK), the global standard for HR excellence. This ensures your team's learning supports the competencies and knowledge areas tested on SHRM certification exams while reinforcing effective HR practice in the workplace.

Scalable Access Through HSI's Learning Management System (LMS)

Customers can access HSI's course library through either the HSI LMS or your company's LMS, making it simple to:

- Assign SHRM-approved courses
- Track completion
- Support ongoing credential maintenance
- Deliver consistent, high-quality HR development

Simple Credit Reporting

The SHRM activity code appears on the exam results page when the course is complete. Once the learner has that code, they simply log into the SHRM portal and submit the code to receive credit. The process is designed to be quick and straightforward, reducing administrative friction for both learners and program managers. This ensures professionals can focus more on applying what they've learned and less time handling reporting details.

Turn Compliance Requirements Into Skill-Building Opportunities

With HSI, maintaining certification isn't just a requirement; it's a strategic investment in HR capability. Instead of viewing recertification as a box to check, organizations can use it to reinforce critical skills and drive measurable performance improvements. The result is a workforce that stays compliant while continuously building expertise that strengthens the business.
