

**SafeTec™**  
An HSI Company

# Solid Chemical Management

**We unlock the data within safety data sheets, and use automation to deliver the structured information you need to manage thousands of chemicals safely and sustainably.**

SafeTec goes beyond safety data sheet (SDS) documentation to help you fully understand, analyze and report on the chemicals used in your organization. We integrate industry-leading tools and support—software, services, information and automation—to make complex processes easy to manage and monitor.

## Safety, Simplicity, Intelligence

SafeTec offers comprehensive, automated safety data sheet and chemical inventory management solutions through SafeTec Encompass, a Software as a Service (SaaS) platform.

We help you improve understanding of the hazardous materials in your workplace by providing leading chemical intelligence solutions and service.

We reduce the complexity and costs of chemical management by configuring our system as needed and automatically processing your critical data fields so safety and environmental professionals across industries have more time to focus on their top priorities.

We help advance collective chemical knowledge for the benefit of the environment as well as industry by employing the latest technology, support tools and field services in every engagement.

In the ever-shifting landscape of chemical compliance and management, you can rely on SafeTec to provide the support and solutions that advance chemical intelligence – for your operation and for the world at large. SafeTec is part of the HSI family of companies delivering the best in workplace safety, compliance and emergency care training. Our solutions cover a vast array of industries and businesses of all sizes.
